

"We have lived in our home since 1979 and our water system was our first major purchase. We have had an additional 2 installed since that time. As far as we are concerned, Culligan is the best and we have made several referrals to our family & friends"

"You tailor my order to my needs and I am not stuck getting a specific amount of water per month. I only order the amount of water bottles I need per month and the cooler rental fee is very reasonable."

"The salesman was great and the installer was awesome. No pressure to buy and the service man went above and beyond. Will recommend you, my softener is working great! Thank you."

*Richard M.*  
Harper's Ferry, WV  
April 2018

"I was asked to set up an appointment after one year, for Mg Oxide replacement, and limestone addition. It turns out that we actually didn't need either one, but the cost of the visit was mostly trip charge. Wish we could have avoided the visit if after one year we didn't need anything. Guess we will just wait another year and hope that in a year's time, the trip to our home will be more productive."

"The products keep my water tasting great and washing soft. Keeps my water heater from rusting out from the water here, in West Virginia. Whenever I call for service, Candy always is courteous and the services requested are scheduled within days. Technicians are prompt, courteous, and the service is great. Thank you, to you and all of your staff."

"I've been with Culligan for many years. Have always received great products and services. Scheduling has always been prompt and courteous, and service personnel have performed their duties quickly and professionally"

*James A.*  
Shepherdstown, WV  
February 2018

"Culligan has and still is a great company to do business with. They have always met the needs at my residence and also at my business. Great people in the office and out in the field. Highly recommend this company."

*James & Betty N.*  
Berkeley Springs, WV  
February 2018

"We were having problems with iron and sulfur in our water. After trying several other water softening systems we decided to replace our old Culligan unit with the Culligan HE Water Softener. I am very pleased with our new unit! The one thing in particular that I noticed was that the unit does not use as much salt as our last system did, and that will pay for the system in the long run. I would recommend a Culligan water system to everyone!"

*Jan*  
Penn Laird, VA  
December 2016

"Service staff is awesome. There is never an issue with delivery. Whenever we need somebody out to look at the water filter they are there very quickly. I have no complaints!"

June 2017

"Verdict from yesterday was contaminated water. Thank you to a friend from Culligan! They were able to do a cheaper, temporary set up for me so I wouldn't be spending thousands of dollars. And, now that it is installed we are able to drink water again, today!"

*Jamie*  
Bridgewater, VA  
April 2017

"I'm a long-time customer of yours who would like to buy some new equipment: a filter and a softener unit. The unit we have has lasted for over forty years. It was overhauled about fourteen years ago, and we are only replacing it to get more efficient equipment."

"Awesome performance by Samantha, Will, and Jason--sales & service manager."

*Daniel*  
Salem, VA  
January 2017

"Although I completed the service report on-line to Angie's List, I wanted to still put in writing my appreciation and satisfaction for the water treatment system and service Culligan Water provided. For 11 months, I dealt with the sulfur "rotten egg" odor in my water as a result of digging a new well and hitting the sulfur spring not too far from my home. The treatment system I had for 10 years prior was not sufficient to eliminate that odor, and even after numerous service appointments and temporary fixes, the other providers (OK, Rainsoft) did not offer a solution or an alternative. You have no idea how happy I am that I met with Brad and Jerry, and agreed to have Culligan Water install a new system. Although I wasn't planning on such an expense, I have absolutely NO REGRETS about spending the money. I am glad now that I have a reverse osmosis system installed at the same time. My coffee has never tasted better. It has been six weeks since the installation and the system is doing exactly what Brad and Jerry said it would. No more rotten egg smell, no more rings in my toilet, no more stained clothes!!!! Your installation crew was hardworking and professional. They were also very tolerant of my many questions and had the knowledge to answer them as related to the system."

"I want to let you know what an excellent idea it was to have the service advisor position, and an even more excellent decision to have Brad as your service advisor. He and his equally kind and knowledgeable co-worker were able to quickly trouble shoot a very simple problem with our water system and did not stop there. Brad continued to explain how our family could get the best results from our water softener and reverse osmosis system and filters. His honest and patience were amazing. He is such an asset to your company! I just wanted you to know! Thank you, tremendously."

"As your customer I would like to inform you that Kevin Hemmis of your organization has taken the time and effort to help with our Culligan system. It is now in good working order. Mr. Hemmis willingly came to our house when he was needed and my wife and I were very happy with him. We found Mr. Hemmis to be professional and patient in educating us on how the system works. Culligan should be proud to have Mr. Hemmis as an employee."

"I would just like to make a comment about one of your customer sales representatives, Bill Worrell. Bill works out of the Roanoke, Virginia, office. Bill is perhaps one of your greatest assets and sales personnel. We own a Culligan water softener and carbon filter system for our home. I had a concern that the system wasn't functioning properly because I was using so little salt in the system. Bill came out, tested the water and found the system to be performing just the way it was supposed to be. He explained the workings of the system to me. He left me feeling confident that I do indeed have the finest water filtering system that a homeowner can have. From his performance and friendly manner, as well as expertise of the product, Bill deserves all of the accolades that can be heaped upon him. I shall always recommend Culligan and especially Bill Worrell to everyone I come across needing better water for a better life."

Virginia  
March 10, 2015

"Dear Will, It has been a year since I purchased my Culligan filtration system. The initial reason for the purchase was the chlorine in my water supply was making me very sick. From the first day of installation, I had no more trouble with chlorine. I feel reassured about other impurities that are being eliminated from my water. I also like the fact that the system lets me know how many gallons of water I use per day. This has been a great help since I was being billed about one-thousand gallons per month more than I was using. I notified the service authority about the difference "

*Sharon*

"Scott, Just wanted to say thanks for getting us scheduled so fast for installing our water softening system. I also wanted to pass on a commending comment for Doug, our installer. He did a great job of not only installing the system but explaining the functions of controls. He is definitely an excellent representative for the company and has very good customer relation skills. I was impressed with the service received today, and felt that Culligan management should be notified of the exceptional experience. If my neighbors are looking for service, I will pass on your card and pass on the great experience we had with the installation."

"I decided to contact Culligan. I figured if I needed a whole new system, I would see if I could find a company that offered better service as well. I am very glad I made that call and had the Culligan system (Softener Clear Plus) installed in October, 2013. I have experienced great service (even after the sale was made) at no annual cost. I am happy with the system as well."
