

Aquasential Smart High Efficiency Iron-Clear Water Filters

Better Water Means Better Living.

Tough on rust stains

If there's iron in your water, you don't need us to tell you how bad a problem it is. Ugly rust stains on your clothes, fixtures and dishes remind you everyday. Culligan's Aquasential HE Iron-Clear Filter takes care of that. Through an exclusive filtering process, iron is oxidized and then filtered, leaving you with fresh, clean water for bathing, cleaning, and washing.

Stops that rotten egg odor

Hydrogen sulfide. If you have it, you know it. It's what causes that "rotten egg" odor in your water. And it doesn't look any better than it smells. Hydrogen sulfide leaves black stains on your laundry and bathroom fixtures. Even worse, it can cause serious damage to your pipes, leading to costly plumbing repairs. Culligan's Aquasential HE Iron-Clear Filter reduces these problems using a filtration process that removes hydrogen sulfide from your water. So you won't have to hold your nose every time you turn on the tap.

Smart technology

Smart technology means you get "set it and forget it" convenience. The Culligan Aquasential HE Iron-Clear Filter will even alert your Culligan dealer if media needs to be replaced or your filter needs service so the dealer can arrange a service call before you even know there is an issue!

Hey Culligan!

At Culligan, we've been committed to providing superior water treatment products for over 85 years. Our units offer state-of-the-art electronic controls, innovative valve design, and are tested to the highest standard. And they're supported by your local Culligan Water® dealer, a water expert that can also provide salt delivery, filter and media changes, rentals and financing options.

**Cleaner, smarter water.
Every drop, every day.**

CLEAR DRINKING WATER

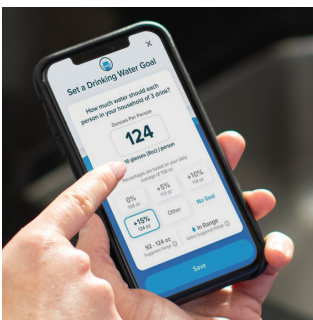

REDUCES STAINING

BRIGHTER LAUNDRY

NO ODOR

Get greater control over your water with our Culligan Connect Consumer App.

Now, it's easy to connect and monitor all of your connected Culligan devices, right from your smartphone or tablet.

- See all your Culligan connected products on one screen
- Manage your water softener remotely
- Dive into greater detail about water usage and product performance

Product Specifications

Patented Smart Technology

- The air compressor is key to the aeration process which oxidizes the dissolved iron and hydrogen sulfide.
- On/off times adjustable to raw water characteristics.
- Automatic bypass valve provides the convenience of bypassing the water softener from the softener itself or by using the Culligan® Connect App.
- Exclusive Culligan Soft-Minder® meter monitors daily water use and provides advanced system diagnostics.
- The easy-to-read back-lit display lets you know your softener is working and warns of system malfunctions.
- Culligan's Connect App provides peace of mind with 24/7 monitoring and control of your Culligan equipment.

Unique Media Filter

- The media in the filter tank acts as an insoluble catalyst to enhance the reaction between the oxygen, iron and hydrogen sulfide.

Chemical-Free

- Requires no chemicals for operation or reconditioning. Oxygen from the compressor is used to naturally clean your water.

Two-Tank System

- Water is forced through the aeration tank (1st tank) which converts dissolved minerals such as iron manganese and sulfur into particulates. The particulates are then filtered through the multi-media tank (2nd tank).

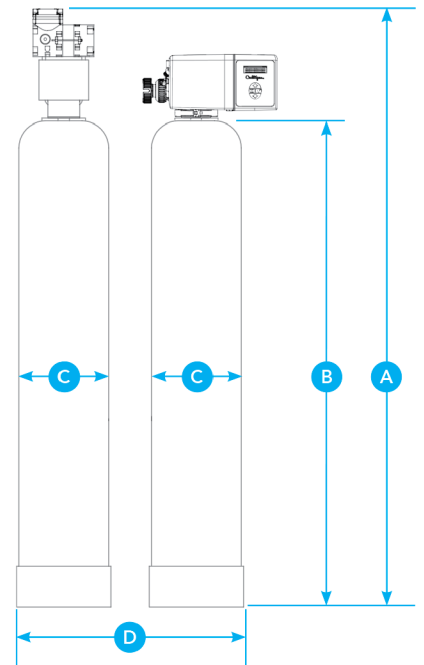

Exclusive Reliable Design

- Mechanical improvements including design updates and indicator lights to make sure it's always in peak condition.
- Exclusive, non-corrosive valve using motorized pistons that provide more reliability than rotary valve systems.
- Sturdy media tank with filament-wound exterior, and smooth, non-permeable inner tank shell.

Product Dimensions

Size	Service Flow (GPM)	Media	Control Valve	A	B	C	D
10"	4	1	1"	67"	54"	10"	26"

Warranties include: 10 years tank, valve, & electronics; 5 years meter; 1 year the entire system.
