

Don't Like the Taste of RO Water?
Worried about the pH of
your water?

NEW!

Introducing the

Culligan Mineral Boost Cartridge

IT BRINGS YOU:

Enhanced Drinking Water: For those that don't prefer the taste of RO water, the remineralization cartridge is a great way to flavor your water with an essence of minerals.

Top Quality: The Culligan Mineral Boost water filter cartridge is NSF 42 and CSA B483.1 certified, which guarantees it meets the highest standards in water filtration.

pH Balance: With this RO remineralization cartridge, RO water pH level is raised by 1 to 2 pH levels to let you achieve drinking water with the ideal pH balance.

Ideal Reimineralization

Your reverse osmosis water filtration system works to reduce total dissolved solids, the Mineral Boost Cartridge can add natural calcium minerals back into the water for additional flavor.

The Perfect Fit

The RO remineralization cartridge fits perfectly with your Culligan RO water filtration system to add even more benefit to the water you drink.

Satisfaction Guaranteed

All Culligan products including the remineralization cartridge are backed with a 100% Satisfaction Guarantee.
