## Discover the Truth About Your Home's Water

If you are worried about water safety, you are not alone! Culligan International administered a "Truth About Water" survey and found that 75% of Americans believe water safety is a growing concern in North America. Additionally, 24% of those surveyed believed that their home's tap water is not safe for consumption.

For the last 80 years, Culligan Water has been here to ease your doubts about your home's water. We've tackled a lot water problems, finding solutions for each one. Furthermore, our technology has evolved making the systems more efficient; saving you time, money, and hassle.

The smoothest way to deal with your water concerns is to educate yourself on the following 5-steps to ensure clean, safe water, for your home.

Know where water contamination can occur

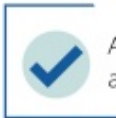

Educate yourself on your current filtration system or the one needed

Take notice of any issues that may be caused by impurities

Schedule a test to find out what your impurities are

Assess the current state of your water and treat issue appropriately
