One Less Worry:

CORONAVIRUS

Not Likely to Enter Your Home Through Water

Despite COVID-19 being in the forefront of everyone's mind, we try to find a little positivity every day! If you are concerned whether the virus can be contracted through your tap, the chances of incurring the Coronavirus via your municipal, or private well, water source is low.

What We Are Doing..

Due to increased health and virus concerns across the country, we are taking extra precautions to stop the spread of germs within our offices and to customers. *Please follow the below sanitary guidelines:*

Wash your hands with soap and water for at least 20 seconds frequently.

Please wear disposable gloves during an appointment and dispose of them when you are done.

Cover your cough or sneeze with your elbow or a tissue.

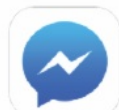

Apply hand sanitizer at the end of every call you are not able to wash your hands.

HOW IT WORKS:

Bring a sample of your home's water to one of our offices,

Or, **Contact us** to let us know you have left a sample outside,

Or, **Contact us** to let us know you would like a sample drawn from outside water spigot.

Safety is our #1 priority, right now and we are following all safety precautions. If you would like a representative to do an in-home water quality test, we are still offering a free-in-home test.

Water Quality Matters to our Fur-Babies, too!

We may not give it much thought, but much like ourselves, our four-legged companions are made-up of predominantly water. So, if your worried about what you may be consuming in your water, it's natural to be concerned what your fur-babies may be inesting.

The simple solution, to ease your worries, is to have a

Culligan Water Expert
complete a *water test*.
