# 10 Facts of {Water} Life

Do you ever just sit and really think about water? How much do you consume? How much does the world consume? Or how much is in our bodies? In light of National Drinking Water Week occurring last week, let's talk water with these facts according to the Environmental Protection Agency:

- We Have the Same Amount of Water on Earth Now as there was when Earth was Formed
- So basically, the water from your faucet could contain molecules that dinosaurs drank!
- Only 3% of the Earth's Water is Fresh Water
- The remaining 97% is salt water. The water found at the Earth's surface in lakes, rivers, streams, ponds, and swamps makes up only 0.3% of the world's fresh water.
- Over 68% of Fresh Water on Earth is Trapped in Glaciers
- That's a large percentage of our fresh water, considering only 3% of Earth's water is fresh
- Water Regulates the Earth's Temperature
- It also regulates the temperature of the human body, carries nutrients and oxygen to cells, cushions joints, protects organs and tissues, and removes wastes.
- The Human Brain is 75% Water
- The same holds true for a living tree!
- A Person Can Only Live About a Week Without Water
- They can live about a month without food.
- Water is Part of a Deeply Interconnected System
- What we pour on the ground ends up in our water, and what we spew into the sky ends up in our water.
- The Average Total Home Water Use for Each Person in the U.S. is about 50 Gallons a Day
- Just think of that gallon of milk in your refrigerator and times that by 50.
- The Average Cost for Water Supplied to a Home in the U.S. is about \$2.00 for 1,000 Gallons
- This is equal to about a penny for 5 gallons.
- More than 25% of Bottled Water Comes from a Municipal Water Supply
- The same place that tap water comes from. Culligan's bottled water is not just tap water; it's filtered through a reverse osmosis system.

# Testimonials

We worked with Brad as our sales rep and Mike for installation.; both were super knowledgeable and so helpful!

Savanah R, Martinsburg, WV  
February 2019

Great service! Alan and Nathan cam to our house for our annual service and were on time, professional, courtious, technically proficient, and even funny! Don't spend your time or money on anyone else if you need your system maintained!

Al U., Barboursville, VA  
March 2019

I was having problems with my AC30 reverse osmosis system. After installing a new membrane filter, it would produce water but soon after it would slow down to hardly any water coming out. Jason Powers came out and diagnosed the problem. It ended up being a clogged capillary tube.

After replacing the capillary assembly, he replaced the membrane filter. He also adjusted the pressure tank to have the correct PSI. We now have good, consistent water productions. Good job Culligan & Jason!

Brian D., Amherst, VA,  
February 2019

## How Does Culligan Stand out from the Competition?

Culligan works to provide better water for our customers through state-of-the-art technology designed to treat tough water problems. But how does Culligan compare to the competition?

- Personalized Service
- Free Home Water Test
- Industry-Leading Products
- Delivery Right to Your Door
- Included Maintenance You Can Rely on
- Limited Lifetime Warranty
- Financing and Payment Plans

*for more information...*

### Tropical Iced Tea

1 qt. boiling hot water	16 oz. pineapple juice
4 orange pekoe tea bags	1/2 c. simple syrup
1 qt. ice cold water	

Using a large pitcher, steep orange pekoe tea bags for about four minutes. Then, remove the tea bags and pour in ice water, pineapple juice and simple syrup. Once you've chilled it in the refrigerator, top the fruit iced tea with some fresh pineapple and sip away to an island far, far away.

*When you think of all the things water wets  
How clean your water is as Important as it gets  
A Culligan Water System can help filter stuff out  
So, cleaner Culligan water's what comes out the spout*
