Reverse Osmosis

## Drinking Water System

Frustrated with your tap water? Tastes or smells funny? Leaving behind stains?

*Don't resort to disposable-plastic bottles of water from the store!!*

**Leave your water problems to us!**

Say "Buh-Bye" to your water problems with a **Culligan Reverse Osmosis Drinking Water System.**

The Culligan RO Drinking water system can provide you with the bottle-quality taste, that you love, right from your kitchen sink, for only pennies a glass! With a variety of filter options, our system can tackle practically any water problems that you are facing, and provide you with better water. If you are concerned with PFOS or PFOA, Culligan's Total-Defense filter was designed to filter out those contaminants in addition to mercury, MTBE's, and VOC's.

# What is "Water Treatment"? And, What Would Work Best for My Home?

Water Treatment can mean everything from a Brita filter that you can buy at your local superstore, to a Culligan Whole-House water softening system. Essentially, anything that modifies your water is considered "water treatment."

Depending on your water needs and source, is what differentiates what sort of water treatment system you and your home may need. If you find that your skin is extra itchy or appliances aren't working as efficiency, this may be cause by hard water, and can be remedied by a water softener. The Culligan Water softener is designed to eliminate minerals, metals, and other elements that cause hard water, leaving you with soft water. On the other side of the spectrum are water filtration systems. These types of systems are generally used to filter and remove chemical contaminants from your home's water, leaving it safe for consumption. With a Culligan Reverse Osmosis Drinking Water System, each system is created to cater to your specific water problems or needs, to give you better water right from your kitchen sink.

## WHAT WATER PROBLEMS SHOULD I BE AWARE OF?

Your primary water source determines what sort of water problems you may face. Whether you are on municipal water, a private or shared well, cistern, or natural water source, we all face some sort of water problems. Below are some of the more common problems people experience along with a Culligan Water solution!

Problem	Solution
<b>Hard Water</b> films/stains on fixtures/appliances/ spotty glasses.	<b>Water Softener</b>
<b>Rust Stains &amp; Iron Water</b> marks on faucets, toilets, sinks, clothes and appliances.	<b>Whole Home Water Filtration System</b>
<b>Bad Taste/Smelly Water</b> high levels of chlorine, hydrogen sulfide, iron or dissolved solids	<b>Reverse Osmosis Drinking Water System</b>
<b>Acid Corrosion/Stains</b> cloudy, hazy and discolored water may leave behind blue-green stains in sinks or bathtubs.	<b>Whole House Water Filter</b>

## Discover How a RO System Can Be Beneficial

Installing a reverse osmosis (RO) system is more than getting a unlimited supply of better-tasting water for your whole home. Find out more about how an RO system can have a positive impact on your household and the environment

### Cleaner, Safer Water

A reverse osmosis system can help remove 99% of impurities commonly found in tap water. RO water is even better than bottled water– although bottled water is filtered, it may still contain certain minerals and contaminants.

### Improved Taste And Unlimited Supply

With an RO system, you can have filtered, high-quality water anytime, eliminating the need for plastic bottles due to undesirable odors or tastes. An RO system's pure water can help create more flavorful soups, beverages, and clearer ice.

### Eliminates Need For Bottled Water

Frequently purchasing single-use water bottles has negative implications on the environment; more than eight million tons of plastic ends up in our world's oceans every year.

### Saves Money

Fewer trips to the store and less money spent on single-use water bottles and filters for refillable pitchers.

## Testimonials

Our Culligan Water conditioner delivers wonderful soft water for showers and regular use. You can tell the difference when the equipment is not working. Our serviceman knew just what to do with what we explained our problem was and made repairs quickly.

*George & Edna E., Harpers Ferry, WV--June 2020*

This company is always on time and very professional. Our service tech answered all of our questions. I highly recommend them for your water treatment services. Great customer service!

*Robbin & Gary H, Amisville, VA--June 2020*

We moved full-time to the Smith Mountain Lake area and knew we had to improve our well water. Ric came out to the house and tested the water. Based on the results, he expertly explained how we could remove sediment and iron, and raise the water pH to the right level. After we reviewed two other major brands, we made the decision to go with Culligan. Our system was installed by Cole, a very knowledgeable and friendly, professional, who obviously takes pride in the quality of his work. Cole patiently answered a lot of questions from me, the homeowner (and retired engineer). Even the service manager, Jason, followed up with me to make sure that we were happy with the installation. The entire process-from initial testing through installation-was first class. I totally recommend the Culligan team-Ric, Cole, & Jason. Culligan's reputation is not only based on the quality of it's products, but also on the support of a strong team. Thank you!!

*Craig C. & Kathy K, Moneta, VA --June 2020*

# JERRY HEMMIS

## V.P. OF SALES

Jerry has been working with *Stoner Enterprises Inc/Stoner Quality Water Inc.* for the past 45 years. Working as VP of Sales, Jerry travels around to our different offices, helping coach and mentor his sales team. He was nominated to receive the VP Sales Award from Culligan International in 2020, however, due to COVID-19 the ceremony has been temporarily postponed.

When Jerry is not working, you will find him at home with his wife, Kathi, of 49 years, in Bridgewater, VA. Jerry & Kathi have 2 children, 1 grandson, 1 granddaughter, and 2 grand-pups. He enjoys spending his free time doing projects around the house or spending time with the grandkids. When he is able to breakaway for a vacation, Jerry & Kathi enjoy visiting Daytona Beach, Florida, and taking in all the sights.

One of Jerry's fondest memories as a Culligan Water expert, is when he went to a customer's home to help them with their water. Following the service, the gentlemen insisted on taking Jerry & Kathi out to dinner for helping with his water. They hit it off and thereafter they became the best of friends; having family dinners and vacations together. This gentleman became one of Jerry's closest, dearest friends, and Jerry always remembers how their friendship came together.

*Jerry testing a customer's water at our Harrisonburg, VA office*

### *A Final Thought*

“ I believe taking care of my family is one of the most important things in my life.

I also believe in taking care of our customers. Delivering them the best water possible and service. ”

**-Jerry Hemmis**
