The Most Common Water Problems

If you have recently moved into a new home or are on well water, it may be recommended to have your water tested for potential problems. And, an understanding of the most common water problems can help keep you and your family safe.

Culligan has curated a list of the most common water problems that we face regularly:

Hard Water

Mineral deposits can corrode pipes and plumbing fixtures. Hard water can shorten the life and reduce the efficiency of water-using appliances and water heaters. Hard water is also a common cause of cloudy glassware and dishes.

Total Dissolved Solids (TDS)

It may cause an unpleasant taste and like hard water, a high level of total dissolved solids can corrode plumbing fixtures and shorten the life of water-using appliances.

Low pH or High pH water

Acidic water can cause premature damage to pipes by dissolving unwanted metals. Rust stains can appear on laundry. If pipe deterioration reaches an advanced stage, water pressure will slow. High pH or high alkalinity can cause aesthetic problems such as a bitter taste, buildup in your plumbing, and lowered efficiency of water-using appliances.

Chlorine

Used to disinfect drinking water since the early 1900s to reduce the harmful bacteria that cause waterborne diseases such as cholera, typhoid fever and hepatitis.

Iron

Iron can give your drinking water a strong metallic taste and affect the taste of food and beverages prepared with it. Like other minerals, iron can damage water-using appliances such as the washing machine, dishwasher and sprinkler system.

Nitrate

Higher levels of nitrate can cause health issues, particularly for babies. Nitrates in the blood combine with hemoglobin to form methemoglobin, which reduces the blood's ability to carry oxygen.

With some of these water problems testing is the only way to detect the contaminant. A Culligan Water Quality Test is a great place to start. It's free and will measure overall water hardness, chlorine, pH, iron and total dissolved solids, among other potential issues. Our water expert will let you know about any concerns or recommendations they may have.

Kevin did an outstanding job--he took time to reroute the water lines so that the filter was set before the softener. Very neat work!

Mike B.
Madison, VA
March 2021

Everything was thoroughly explained and the water is so good now.

Sharon O.
Frederick, MD
April 2021

I'm so pleased with my new system. I wish I had it installed years ago. So far, no more mineral build-up. Love it!

Susan B.
Salem, VA
March 2021

I am very satisfied with the work done. Your people working were great. Thank you.

Mary G.
Emmitsburg, MD

IN CASE YOU MISSED IT!

May was a busy month here at Culligan Stoner-Water!

We would like to start with a congratulations to 2 of our Hagerstown Water Experts, Brad K. and Ron C.! Their hard work and dedication over the years has scored them their very own Culligan-mobiles! Jerry H., VP of Sales, was honored to hand over the keys to these 2 gentlemen for their perseverance over the years!

Jerry & Brad

Jerry & Ron

We would also like to congratulate one of our Roanoke water experts, Ric Y. Ric was awarded by our DM, Jim B., as top salesman of 2020 in our district. Culligan Water presents these awards for various sales goals to representatives stretching from Virginia to Maine.

Ric & Jim

Great job!

Not only was May a big month for us, June was our Culligan/Stoner Enterprises & Stoner Quality Water Annual Company Picnic. We had one of the largest turn-outs yet! Employees travelled from our Maryland and Virginia offices, all coming together for good food, music, laughter, and to help with some special surprises.

One of our big surprises was for our Commercial Sales/Service manager, Brandon B. who is fighting one of his biggest fights. Upon his arrival to the picnic, he was surprised by a flood of blue "B STRONG" shirts to show our love and support for Brandon, his family, and their fight.

We also got an opportunity to surprise our VP of Sales, Jerry H.! Throughout the pandemic he worked tirelessly with the sales team to provide our customers with better water. His hard work paid off this year when we reached our highest sales month in our Culligan business history. The sales team rallied around to surprise Jerry and presented him with an award for Highest Achievements.

The Stoner's set up a day long picnic that entailed fun for all! There was a face-painting station, a corn-hole tournament, food, drinks and a snow-cone truck, amongst many other activities for all ages. At the end of the day, we all enjoyed the delicious food and camaraderie of our offices coming together!
