Preventative Maintenance

Tips for Your Water Treatment Systems

Water Softener

Add solar salt as needed

Cullneu (Acid Neutralizer)

Recommended to have checked and/or replenished yearly

UV Light

Bulbs need to be changed yearly to ensure water quality

Chemical Feeders

Recommended to be checked yearly

RO Drinking Water System

Filters are recommended once a year; module is recommended every 5-7 years

Polyphosphate Filters

Recommended change every 1-year

Whole House Filters (Big Blue, Big Gray, Ametek)

Recommended changed every 6-months; this time-frame may differ depending on your water quality

Winterizing Your Equipment

When to winterize your equipment:

- If your unit is outside
- If your unit is in an unheated space
- You're planning on leaving your home for an extended period of time

What to do:

- Insulate the pipes going to/from the unit
- In enclosed unheated spaces where temperatures get below -5 F consider using a space heater
- If you're leaving for an extended period of time, look at emptying your tank to prevent your salt tank being damaged or broken

*Please note all recommendations may vary depending upon your water quality, water treatment, and water usage.
