## May is Drinking Water Month

In 1988 President Ronald Reagan initiated and proclaimed the first week of May as "Drinking Water Week." Piggybacking on that initiative, Culligan declared the entire month of May as "Drinking Water Month." We use this month to promote cleaner drinking water and raise awareness about water quality. We aim to educate and raise awareness about contaminants, its origins, and the importance of effective water treatment solutions. We promote eco-friendly water usage routines, in addition to water quality pertaining to everyday activities, such as cooking, drinking, showering, and anything water touches. As a company, we promote our Free basic water quality tests that allow our consumers to gain insight about whether contaminants exist in their water and what, if any, water treatment system would be the most effective solution for their water problems.

Avoiding single-use bottles could cut →  
microplastic intake by over 90%

With a Culligan RO System →  
Enjoy Improved Taste and On-Demand Supply

### Better Water = Happy Customers

Good customer service. Good products.

Fred T.

★★★★★

Have had a Culligan water softener for many years and find them to be dependable. Josh was able to find out problem quickly. He was very friendly and professional and very knowledgeable about the water softener. Would definitely recommend.
